# **OurMedia**

Join Ourmedia in bringing the voice of Generation Z into the priority setting around AI for work, life, and learning.

**JULY 2023** 

Ourmedia is working to develop a community-oriented path forward for AI for work, life, and learning. Our primary goal is to identify data-driven ways to adapt our current systems, surfaced directly from those being impacted by the changes. Alongside our efforts to build knowledge networks around the future of AI is the belief that providing members of Generation Z with opportunities to think and communicate critically about real world issues now equips all of us for a better future. We are working towards a roadmap for what a stable, successful Generation Z might look like in the 2030s. We are committed to:

Student and Generation Z centered strategies

Developing common frameworks for tackling issues surrounding AI and society

Building community across generation and discipline

Increasing access to opportunities and training around Al Growing the responsible tech ecosystem to include underserved voices

#### Success with Student Listening Sessions:

Our past efforts have involved developing listening sessions to efficiently surface the voice of students alongside faculty and staff regarding AI in higher education. We hosted a listening workshop in March 2023 at the University of California, Santa Barbara and walked away with an actionable set of priorities moving forward to adapt the university system to AI in ways that serve students and civic life. We are currently expanding that session across the California college network to grow this archive of student voices.

#### Looking forward, we are developing programs to:

## Ourmedia is looking for partnerships in a number of areas, including:

We welcome your feedback and partnership. Visit us at Ourmedia.org or email taramandrekar@gmail.com to connect
